Introducing the "Mysoft Toolkit" Result & Average system

Completely new for 2008 this "Toolkit" program takes the best from the original "Mysoft Result and Average system" and adds many new time saving features. Importantly is now fully compatible with both the RPRA distance export/import system for distances and the ETS systems used by clubs.

Below is a typical club result that shows the detail produced from the "Toolkit" program and all pools, prizes and all averages, points (includes Loft, Bird and Coefficient as standard) and an option for printing your own certificates or printing from the program onto specially purchased certificates.

A customised database software program solution gives your club or organisation an advantage by allowing you to use IT in a more efficient and effective manner. Custom databases / tailor made applications that are developed to your exact specifications and requirements do not have to cost the earth and can save you a considerable amount of time and effort. By opting for a database design from our specialised company it becomes an efficient method for clubs and organisations to reduce time and expenses, while building a professional and enjoyable result and secretarial system.

The Mysoft Toolkit program – a summary of some of the many features

- Complete result printouts designed exactly for your club
- Result sheet customised to your specification and layout
- Full summary sheet for Federation Secretary - Print and sign
- Email club result complete with all information required by Federation
- Fully compatible with all ETS systems
- Built in pool and prize payouts
- Contain full list of RPRA liberation sites and codes

- Open race facility plus end of year club summaries by member/race
- Help pages on every input form
- Easy data entry with full audit trial and every race stored for easy recall
- Label generation for single and multiple members
- Receipt generation for Subscriptions, Rings and RPRA fees
- Automatic import and export of member distance data via RPRA
- Averages, Loft, Bird and Coefficient points automatically built in
- Race certificates can be in house or to pre printed forms
- Race certificates can include your choice of pigeon photographs
- Extensive query and report menus.
- Reports can simply be displayed and printed as required
- Automatic Back up and email and website uploads of results
- Print Club Year Book. All race results and average tables etc
- End of Season clean up routine
- Clean start for new season
- Programs hold all data required by club…all in one system
- Can be updated/added to/edited – at any time to suit the user

In addition the Mysoft Toolkit would also do the following….

- Ability to export club results directly to a Mysoft Federation system
- Individual and all race balance sheets
- Breakdown into club within a club eg Divisions 1 & 2
- Ability to email results and upload to websites as required
- Automatic generation of race certificates and Diplomas/Special awards
- Ability to compile various averages and special averages or points
- Individual race 2 and 3 bird member velocity averages.
- Same pigeon averages over any number and combination of races

- All averages and report generation reduced to a single button click
- Up to date real time information immediately after a race is compiled

Race Certificate direct from the "Toolkit" program

ETS Systems

The introduction of ETS has highlighted the need for improved result software. Although its use is still under review, clubs and organisations may consider adopting ETS. At the present time it needs careful consideration and above all it needs to be on a level playing field with traditonal clocks and timing systems. As for the ability to time up to 10 + pigeons per second then good electronics systems are required and therefore good software is also required.

Currently a customised system would be able to handle the small differences on timing of many pigeons and importantly the ability to limit pigeons on a result can be achieved. Given the compatibility issues still being discussed it will be possible to link ETS systems to a customised program to obtain the benefits of both products to the clubs advantage. Clubs should not settle for a basic result but one that is tailor made for them, easy to read and understand, backed by average and points information and easy for the Secretary to use. Email and Web site upload of results is also important and easily achieved, given today's integrated systems.

Ease of use and design

The Mysoft Toolkit was developed over many years and is used by major clubs and organisations and their help and dedication has helped shape the current system. All reports, average and points systems have been reduced to a single button click making this program a joy to use. Our list of major customers is proof of our achievement and we hope that you will join our growing list of satisfied customers.

Finally, The "Mysoft Toolkit" customised system should offer genuine **value for money** to its users. As a minimum Mysoft offers the following as part of any package deal

- Free no obligation consultation
- **Lifetime support**
- Lifetime product warranty
- Best practices and industry standards adopted
- Full documentation supplied as standard

Already proved by some of the countries largest clubs and organisations "The Mysoft Toolkit program" is a must for a modern club seeking to improve its service to the members and to make the job of compiling results and backing this up with good weekly updated information to members easier for the hard worked Secretary.
